PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience building enterprise applications across banking, financial services and platform engineering. Experienced in Java, Spring Boot, REST API development, microservices and Kafka-based event processing, with full-stack development using React and Angular. Contributed to secure customer-facing and operational platforms for global financial-services clients, including cloud-based services, identity integration and automated testing.

TECHNICAL SKILLS

Programming	Java (8, 17, 21), JavaScript, TypeScript, SQL
Backend & Architecture	Spring Boot, REST APIs, Microservices, Apache Kafka, Event-Driven Architecture, Distributed Systems
Frontend & Security	React, Angular, HTML, CSS, Microsoft Entra ID, Authentication, Authorization
Cloud & DevOps	AWS (Lambda, API Gateway, EC2, S3, DynamoDB), Docker, Kubernetes, Jenkins, CI/CD
Data, Testing & Tools	PostgreSQL, MongoDB, JUnit, Mockito, Elasticsearch, Kibana, Git, Maven, Postman, Jira

PROFESSIONAL EXPERIENCE

FISERV | Full Stack Developer (Jul 2023 – Present)

Bounce Track | Jan 2025 – Present

- Contributed to an existing event-driven platform that publishes email non-delivery events to Kafka for downstream processing.
- Developed React frontend and backend functionality for Client Management and Orchestration Management capabilities.
- Implemented a Kafka consumer service to consume and process email non-delivery events.
- Integrated Microsoft Entra ID to provide application authentication and authorization.
- Supported onboarding of Optis, the platform's first client; its configuration-driven model is intended to support additional client integrations. The roadmap anticipates more than 1 million events per day as adoption expands.

Signature International | Jul 2023 – Dec 2024

- Modernized legacy banking functionality by migrating RPG-based components to Spring Boot microservices with Angular interfaces.
- Developed REST APIs and backend workflows for cheque management, account operations and banking product integrations.
- Implemented cheque stop/hold payment and cheque-book ordering workflows; contributed to Agent API integrations for internal automation and service orchestration.

FISERV | Backend Developer — Westpac Australia, ConnectID (Mar 2022 – Jul 2023)

- Developed Spring Boot REST APIs and consent-management services for secure customer data sharing between banking systems and third-party vendors, with validation and authorization controls.

FISERV | Full Stack Developer — Westpac Australia, Card Reissue (Mar 2021 – Feb 2022)

- Built Spring Boot microservices for debit/credit card replacement workflows and transaction validation; developed React UI components and automated JUnit/Mockito tests.

COGNIZANT | Full Stack Developer — Financial Conduct Authority, UK (Jul 2020 – Mar 2021)

- Developed Spring Boot and Angular applications using AWS Lambda and API Gateway; enhanced search capabilities for regulatory platforms.

SELECTED ENGINEERING PROJECT

AI Incident Resolution Agent — Java 21, Spring Boot, Kafka, PostgreSQL, Spring AI and local LLM integration

- Building an event-driven incident-processing workflow with Kafka and Spring Boot, PostgreSQL persistence and an LLM-assisted resolution capability.

EDUCATION & CERTIFICATION

B.Tech, Computer Science Engineering — DIT University, 2020 | **AWS Certified Cloud Practitioner** (2023–2026)
